

Newington Primary School

SUNSMART POLICY

PURPOSE

The purpose of this policy is to encourage behaviours at Newington Primary School to minimise the risk of skin and eye damage and skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August – end of April)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

SCOPE

This policy applies to all school activities, including camps and excursions. It is applicable to all students and staff.

POLICY

Excessive exposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer.

UV radiation:

- cannot be seen or felt
- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the year (highest in Victoria from mid-August – end of April)
- peaks during school hours

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 and above (typically from mid-August to the end of April in Victoria). Information about the daily local sun protection times is available via the free SunSmart app, or at sunsmart.com.au or bom.gov.au.

Newington Primary School has the following measures in place to help reduce the risk of excessive UV sun exposure for staff and students.

Shade

Our school will provide sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as popular play areas.

When building works or grounds maintenance is conducted at the school that may impact on the level of shading available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

Sun protective uniform/clothing

From mid-August to end of April, and whenever UV levels reach 3 and above, students should come to school wearing sun-protective clothing such as:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts

The school uniform and dress code includes sun-protective clothing, including:

- loose, cool, closely-woven fabric
- shirts with a collar and/or high necklines
- tops with elbow length or long sleeves
- longer style shorts and skirts

During the sun protection times (mid-August to end of April) - students are required to wear a wide-brimmed school hat that protects the face, neck and ears when outdoors. Students who are not wearing appropriate protective clothing or a hat will be asked to play in the shade or in a suitable area protected from the sun.

Staff should role model SunSmart behaviour and wear an appropriate sun protective hat when outdoors.

Sunscreen

The school encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours according to [manufacturer's instructions](#).

Staff and families should role model SunSmart behaviour and are encouraged to apply SPF 30 (or higher) broad-spectrum, water-resistant sunscreen when outside.

Sunglasses

Where practical our school encourages students and staff engaged in outdoor activities to wear close-fitting, wrap-around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible.

Curriculum

Students at our school are encouraged to make healthy choices, and are supported to understand the benefits and risks of sun exposure.

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

REVIEW

This policy will be reviewed as part of the school's three-year review cycle.

This policy was approved by School Council in December 2021 and is scheduled for review in 2024.
